15

The 2009 ZOMBIE delivers high performance turning dynamics with super stable and reliable flying characteristics. The Zombie is designed to get you out on the water, keep your kite in the air, and get the most out of your session. With smooth and precise handling the Zombie's performance is ideal for wave kiting and flatwater free-style.

The 2010 ZOMBIE offers the latest in bomb-proof construction, with new inflation hardware, boasting the industries most reliable inflation system. Caution has been a leader in seam construction since the beginning and the ZOMBIE features our bombproof LE closure seams and taped triple stitched panel seams.

The complete redesign of our 2010 control bar features a new one piece spring tensioned quick release, on-the-fly power adjuster, under-the-bar spinning capability and new high grade flying lines.

The ZOMBIE is the ultimate freeride kite, designed to deliver the most out of every session.

Sizes include: 6, 9, 12, 15
(All Kites Measured in Flat Area)

FEATURING

- Lightning quick response
- 5 strut design with Caution's proven Single Inflation System
- New leading edge closure seam
- New fail proof distribution valves
- Short bridles and new rear line traveling attachment point
- Increased stability and expanded optimized sheeting range
- Caution's Flex Strut Union for durability and high performance

CONTROL BAR

- Precise steering characteristics
- New spectra throw line with on-the-fly cruise control ball
- Ergonomic throw length with easy length adjustment
- User friendly 4 line bar; no pulleys or needless clutter
- New ergonomic carbon bar prevents hand fatigue
- Spinning safety leash suitable for beginner to expert riders
- New one piece spring tensioned Quick-Fire Safety Release
- Trim loop designed with unhooked riders in mind
- 24 meter Dynema color coded premium flying lines

DURABILITY AND MATERIALS

- Quality materials from industry leaders: Teijin, DP and Cousins
- Caution's rigorously tested and proven bullet proof construction
- Glued and triple stitched seam technology
- Double ply trailing edge
- Low stretch panel layout
- Shaped speed struts

ULTRA STABLE • SMOOTH HANDLING • BOMBPROOF CONSTRUCTION
